SUMMARY

Full-stack engineer with 14 years of JavaScript, with production experience across React, Next.js, Angular, GraphQL, Node.js/Express and RabbitMQ. From 2016 to July 2026 at TEMABIT (Fozzy Group), promoted from Middle Full-Stack Developer to Senior Full-Stack Developer, Tech Lead and Team Lead; built 7 product areas end-to-end (front-end UI, GraphQL API integration, backend services) at Ukraine's largest grocery retailer (900K+ monthly organic visits, record monthly gross merchandise value (GMV) of 61M UAH, Ukrainian hryvnia). Launched Shop Silpo in React + TypeScript in ~3 weeks and built two Node.js services exchanging data over RabbitMQ. Comfortable owning a feature from database table to shipped UI. Open to work since July 2026.

EXPERIENCE

Team Lead

TEMABIT Software Development (Fozzy Group) · Vinnytsia, Ukraine · *Mar 2016 – Jul 2026*

Scope: silpo.ua, the Shop Silpo online store and internal retail tools for Fozzy Group. Promoted Middle Full-Stack Developer (2016) → Senior Full-Stack Developer (2018) → Tech Lead (2019) → Team Lead (2022); hands-on development throughout.

Team Lead (2022 – 2026)

Scope: hands-on full-stack feature ownership (React/Angular frontends, Node.js/GraphQL services) while leading the team.

END-TO-END FEATURE OWNERSHIP

- **Recipes (2025):** front-end architecture and development + back-office CRUD (Angular monorepo) + an MCP server for creating and editing recipes: the MVP gave ~+5% overall sales (internal estimate); after expansion into the full section, x32 page views, +200% purchases, +31% order conversion
- **Banners/promo-blocks microservice:** built the front end on top of the extracted service and an MCP server for creating and editing banners; onboarded a new product (LOKO, 50+ banners) with zero incremental dev
- **Page Builder (late 2025):** personally designed and built it; front-end block renderer + Angular back-office constructor + backend page-builder-service, 10+ configurable widgets, Angular SSR; JSON Schema describes each block's fields and a React/TypeScript form generator renders the settings with validation, so new blocks need no per-block backend work or hand-built forms
- **City promo pages (/offers/city/{city}):** shipped as a quick SEO solution with one route per city, letting users open a city's promotions directly; +10% organic traffic within 3 months, still live
- **Shuba partner integration (2024):** designed and built "Buy ingredients" from recipe pages on the partner site shuba.life: a dynamic link carries the ingredient list in the URL to silpo.ua/shopping-list, which shows a product carousel per ingredient; ~10% of visitors coming from Shuba make a purchase
- **Routing/404-service and merger (~2023–2024):** designed the routing rules and took part in building the gateway (database-driven route resolution, Nginx + Node.js/Express) deciding React vs Angular rendering per request; merged silpo.ua and Shop Silpo (+12% traffic, +4% conversion)
- **Add to cart from content pages (~2023):** Shop Silpo API in silpo.ua pages; homepage widgets ~+15% conversion (internal estimate); shared React/Angular header as a Lit Web Component

FRONT-END DEPTH AND DELIVERY

- **Improved Core Web Vitals (LCP/FCP) by 40%**, cut JavaScript bundle size 17%; QR-code complaints flow for stores (React, from scratch)
- GraphQL API integration (graphql.silpo.ua), REST API design for banners/page-builder services, 100+ microservices, RDS PostgreSQL
- Designed Azure DevOps pipelines, extended existing GitLab CI/CD pipelines, wrote Dockerfiles, set up Sentry
- Designed a Kiro CLI multi-agent workflow for feature development and rolled it out inside the company (~50% time saved, internal estimate); owned the React direction across Silpo teams (2024 – Jul 2026) and chaired the React Forum (early 2025 – Jul 2026)
- **Leadership (secondary to IC work):** owned the Architecture Decision Record (ADR) process, mentored 5+ to senior level

Tech Lead (2019 – 2022)

- **Led 3 teams of 6 people each (2020–2022):** Content, Shop and Resto teams
- **Launched Shop Silpo (2019) from scratch in React + TypeScript in ~3 weeks:** built the core architecture of its two SPAs, including catalog, cart, checkout and registration flows; the platform grew from ~10 stores at launch to ~300 about three years later; "zero catalog" (~2020–2021)
- **Standalone Recipes site (2021 – early 2022):** architect and Tech Lead for a team of 6; wrote part of the Next.js front end and built two Node.js services, one in the internal and one in the external network, exchanging prices, stock and recipes over RabbitMQ; PostgreSQL as the database. Closed before launch after the full-scale invasion in 2022
- **Store pickup orders:** designed the process, front end and front-end/back-end data structures; handed Shop Silpo to another team for a React → Angular rewrite (~2021)

Senior Full-Stack Developer (2018 – 2019)

- Joined the existing silpo.ua React product (Redux, GraphQL): UI improvements, new features, promo pages, front-end architecture
- Page Constructor (~80% lower cost per page, internal estimate); event e-tickets and gift e-certificates (payment page template hosted by UPC)

Middle Full-Stack Developer (2016 – 2018)

- Contributed to the first iteration of an Electron-based self-service app for Bizerba scales on an existing Linux system, used in Silpo and Fora stores; my part: research, interface design, database optimization, part of the Node.js services (React, Electron, Node.js, PostgreSQL)
- PromoTools internal CRM interfaces (Kendo UI); Angular 2+ front end for an outstaff project under NDA

Middle Full-Stack Developer

AppsStudio · Ukraine · *Mar 2015 – Mar 2016*

- **Sole developer on four cross-platform mobile apps** (Sencha Touch + PhoneGap), all published to Google Play and the App Store: built YOUNell (nutrition-tracking app) from scratch, maintained and extended ibibook (services marketplace startup), maintained Pizza House and Roll.lg (food-delivery ordering)
- Worked directly with the project manager who set the tasks; wrote a local Node.js server for development

Frontend Developer (Freelance)

2012 – 2015 · part-time

- JavaScript development; themes and templates for Joomla, WordPress and Drupal

HTML Markup Developer (Freelance)

2009 – 2012 · part-time

- HTML/CSS markup

PROJECTS

silpo.ua — Unified E-commerce Platform

Ukraine's largest supermarket chain (Fozzy Group, 300+ stores)

Scale: 900K+ monthly organic clicks · 49.5M search impressions/quarter · 1.66M active weekly users · 61M UAH record GMV/month

Stack: React · Redux · TypeScript · GraphQL · Node.js · Next.js · Angular · CSS Modules · Webpack

- Full-stack ownership of multiple product areas: front end, GraphQL/REST API, backend service and infra; 100+ microservices, CI/CD in GitLab, monitoring via Sentry

SKILLS

Frontend: React.js, React, Redux, TypeScript, Next.js, Angular, HTML5, CSS3, CSS Modules, Tailwind CSS, Stylus, Storybook, Lit (Web Components), NX monorepo, i18n

Backend: Node.js, Express, GraphQL, REST API design, RabbitMQ, TypeORM, Python (personal projects, PyPI packages)

Infrastructure: Docker (Dockerfiles), Nginx, Azure DevOps pipelines, GitLab CI/CD, Sentry (set up), Grafana (used), AWS (user level: RDS PostgreSQL, CloudWatch), Microservices architecture

AI/LLM: AI-assisted development (Claude Code, custom MCP (Model Context Protocol) servers), agentic workflows, LLM-based internal tools, generative-AI API integrations (npm CLIs)

Personal projects: NestJS, Prisma, Redis, MongoDB, DynamoDB, Elasticsearch, Cloudflare, WebSockets

Tools: Git, Webpack, Jest, Playwright, Cypress, Figma

Practices: Code Review, Agile (Scrum, Kanban, Waterfall by project stage), A/B Testing, Mentoring, Hiring interviews, Performance (Core Web Vitals), Accessibility (WCAG), SEO, SSR

OPEN SOURCE

- **mcp-comfy-ui-builder** — MCP server for ComfyUI (50+ tools, WebSocket real-time execution), published on npm
- **laya-cli** — typed-decisions CLI (choice/score/noul, streaming batch mode), Python, published on PyPI
- **kie-media-cli** — CLI for the KIE generative API (image/video/audio generation), published on npm
- **job-form-filler** — Chrome extension + MCP server that fills job application forms from a local profile, never auto-submits; published on npm
- **perplexity-pro-mcp** — MCP server for Perplexity search, follow-ups and threads, TypeScript, published on npm

EDUCATION

Master's degree — Vinnytsia State Pedagogical University · 2002–2007

Java, Android and iOS (Objective-C) courses, Level 1 — GeekBrains (certificates issued as Shkola Programmirovaniya) · 2013–2014

JavaScript course — RIA.com internal IT courses · May–Dec 2012

CERTIFICATIONS

- Claude Code in Action — Anthropic (2026)
- Claude 101 — Anthropic (2026)

LANGUAGES

Ukrainian — Native · English — Upper-Intermediate (B2) · Russian — Native

INTERESTS

- **Wrestling** — Master of Sports in Greco-Roman wrestling, 5x regional champion, bronze medalist at Ukrainian Universiade. Former wrestling coach before transitioning to IT.
- **Family** — Married, 3 children. Pet lover (dog, cat, fish).
